REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: prior art of record does not teach or suggests in combination a method or apparatus for encoding data wherein the initial state of a convolutional encoder is selected from a set of at least two allowable initial states based on the data rate and at least one of the two allowable initial states is a non-zero state, as recited in claims 1 and 10. Furthermore, a method or apparatus for decoding data wherein the initial state of a Trellis diagram is selected from a set of at least two allowable initial states based on the data rate and at least one of the two allowable initial states is a non-zero state, as recited in claims 5 and 14.

Although Crozier et al. (US Patent No. 6,530,059 cited in the Office Action mailed April 16, 2004) discloses using non-zero initial states, it does not teach selecting the initial state based on the data rate.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
